

## Year 2

## DT: Textiles—Woven products

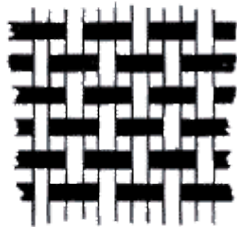

### Learning to Recap:

- To design is to plan and make something with a specific purpose.
- Design criteria are the rules we follow when designing a product
- Tools and equipment are used to cut, shape and join materials
- Materials are the things needed to make a design
- To evaluate is to compare designs are say what is good and what needs improving.

### New Knowledge and Vocabulary

#### Weave

To create a piece of cloth by inter-lacing strands of material.

Plain Weave

#### Loom

A machine or device for weaving on.

#### Recycled materials

Include paper, plastic, glass, textiles. Reusing materials

#### Products

Various different products can be made from the same material e.g., bag, box, mat
