Non Fiction:

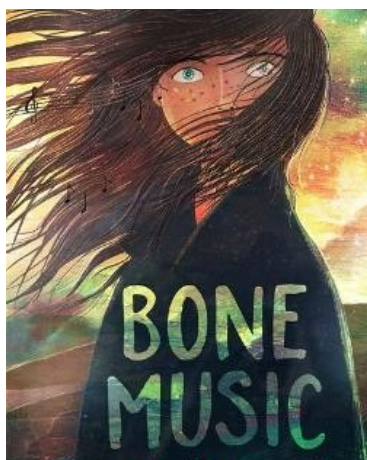

Think Like a Scientist

by Susan Martineau and Vicky Barker

Highly recommended for pupils in years 4-6, this lively and informative guide outlines how a scientist frames a hypothesis, investigates, evaluates and forms a conclusion. With clear and detailed illustrations and short chunks of text, keeping an open mind, safety, and distinguishing science from hyperbole are tackled in an accessible and fun way. Strong on thinking skills, methodology and accurate scientific language, this is a must-have book. Think Like a Scientist is a particularly useful book for primary aged pupils who are interested in science but don't yet have access to a school science lab for a hands-on experience of scientific methods or practical experiments

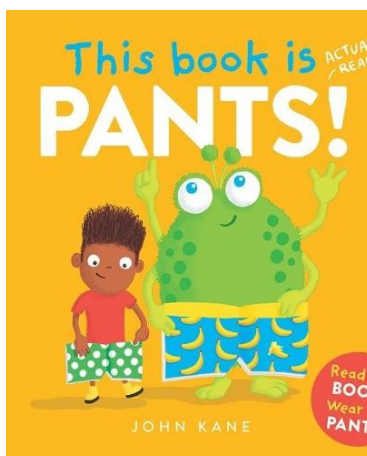

Fiction:

Bone Music by David Almond

This wonderful tale transports the reader from the city to the forests and fells of Northern England. Under a boundless starry sky, the unforgettable Sylvia Carr reconnects with the ancient past and discovers what it really means to be young in the world today.

Picture book:

This Book Is Pants

by John Kane

Whatever the problem or tricky situation, there's a different pair of pants to save the day in this original and brightly illustrated picture book for the under-fives. Teachers will be saying 'wear your book' rather than 'where's your book' as readers are invited to adorn the open pages whenever pants are mentioned. A clever die-cut on the spine unfolds 'speedy', 'hot', 'smarty' and 'the best pants ever'. It's an EYFS book and World Book Day costume in one!
