

# Year 1 Geography/Science: Seasons and Weather (Water Cycle) (half-term)

## Learning to Recap:

- Some types of weather: sun, rain, snow, wind
- Feelings linked to types of weather: hot, wet, cold
- Clothing linked to types of weather: sun hat, sunglasses, sun cream, rain coat, umbrella, coat, hat, gloves, scarf, wellington boots
- Keeping safe: wearing a sunhat, sun cream and sun glasses in the sun and wearing a hat, coat, gloves and scarf when it is cold

## New Knowledge and Vocabulary

Weather	Examples of weather are: rain, wind, sun, snow, fog, storm, hail and sleet
Seasons	Winter, Spring, Summer and Autumn
Day light	Days of sunlight are longest in the summer and shortest in the winter.
Weather Forecast	Predicting temperature, cloud cover and precipitation (water) in a certain place. Weather forecasts help people prepare .
Temperature	How hot or cold it is. Measured with a thermometer.
Clouds	Made of tiny droplets of water which float in the air. There are different types of cloud.
Precipitation	Any form of water that falls to Earth: rain, snow, sleet, hail
Water cycle	How water is moved—evaporation, condensation, precipitation

## Seasons

Winter	Spring
December, January, February	March, April, May
Rain, snow and frost	Sun, rain and wind
Cold	Dry
Trees with no leaves	Blossom
Evergreen plants	Frog spawn
Robins	Birds building nests
Animals hibernating	Baby animals
Summer	Autumn
June, July, August	September, October, November
Sun	Sun, rain, wind
Hot	Slugs and snails
Flowers	Squirrels looking for nuts
Bees and ladybirds	Trees losing their leaves
Trees with green leaves	

Because, but, (therefore)...

Summer is the best season because...

Summer is the best season but ...

## Application of knowledge

**Present a weather forecast using symbols and terminology**

Describe the water cycle using evaporation, condensation and precipitation
