

# Miss Fielden's Mystery Object

- Once a month
- Clues and information
- See the object
- Challenged to be creative with the object
- Prizes for creativity!

# The Clues!

- Invented in 1868 – 156 years ago- by Christopher Latham Sholes.
- Invented in Milwaukee, Wisconsin in the USA.
- It contains on average 49 buttons.
- It also contains ribbons and ink.
- Many famous people have used this invention including Winston Churchill and Agatha Christie.
- It makes a rhythmic clickety-clack sound.
- It sped up communication.

# A riddle!

I have no screen, yet words I show,  
With keys that make a steady flow.  
I click and clack as letters appear,  
Ink on paper, crisp and clear.

Once used by Twain and Churchill too,  
To share their thoughts and stories true.  
No delete, no undo, you see-  
What old invention could I be?

Any guesses?

# A typewriter

# Time to get creative.
